btrfs-map-logical(8)

SYNOPSIS

btrfs-map-logical <options> <device>

DESCRIPTION

btrfs-map-logical can be used to find out what the physical offsets are on the mirrors, the result is dumped to stdout by default.

Mainly used for debug purpose.

OPTIONS

-l|--logical <logical_num>

    Logical extent to map.

-c|--copy <copy>

    Copy of the extent to read(usually 1 or 2).

-o|--output <filename>

    Output file to hold the extent.

-b|--bytes <bytes>

    Number of bytes to read.

EXIT STATUS

btrfs-map-logical will return 0 if no error happened. If any problems happened, 1 will be returned.
